Profile

I am Mukesh Jena, proficient in Flutter, Java, UI/UX. My versatile skill set empowers me to craft cross-platform mobile apps and web solutions, driven by a passion for innovation and a commitment to excellence.

Education

Bachelor of Technology in Computer Science & Engineering   2020 – 2024
Gandhi Engineering College - Bhubaneswar,Odisha

12th Grade   2018 – 2020
NIST Higher Secondary School - Balasore,Odisha

Experience

Software Developer Intern   Jul 2023 – Aug 2023 │ Bhubaneswar, Odisha
Web Bocket
- Led the UI design phase for a Point of Sale (POS) software using Figma, creating a visually captivating user interface.
- Implemented the design into a functional Android application using XML and Java, enhancing the software's usability and performance.
- Worked closely with senior developers, gaining insights into project collaboration and teamwork.

Android Developer & UI/UX Designer   May 2023 – present │ Bhubaneswar, Odisha
Prince Corp
- Collaborated closely with a friend's dream company, contributing to UI/UX design for websites and mobile apps using Figma.
- Created multiple Android apps with Flutter, XML & Java, showcasing versatility in modern app development.

Projects

BrowserX   Sep 2023 – Present
- BrowserX, a feature-rich web browser developed using Flutter. Designed to enhance user experiences, it seamlessly integrates various functionalities
- Integrated Unsplash API for dynamic background images and InAppWebView for seamless web searches.
- Incorporated NewsAPI to deliver the latest news directly within the browser, enhancing user engagement.
- Implemented Sqflite local database for storing and preserving recently viewed image URLs, ensuring a consistent and personalized browsing experience.

Portfolio Website   May 2023 – Jul 2023
- This is my portfolio website, I have provided my skills, education, and all the projects that I did in the past.
- This website is built using HTML, CSS, JS, and integrated SMTP.js to enable real-time email notifications from the contact form.
- I hosted the website's front-end on Netlify for seamless accessibility and high availability.

WhisperWaves   Jun 2023 – Aug 2023
- WhisperWaves, a secure chat application using Flutter, Firebase Auth, and Firestore. The app facilitates private conversations between users.
- Proficiently integrated Firebase Authentication and Firestore for robust user management and data storage, enhancing the app's reliability and scalability.
- It is designed with a privacy-first approach, ensuring that only authorized users can engage in confidential conversations.
